Superfund & RCRA Representation

Businesses today have to contend with complex environmental laws and compliance issues regarding hazardous substances in the environment. Experienced counsel is essential to help you successfully develop and implement a customized plan that addresses applicable legal requirements.

Since EPA enacted the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA or Superfund) in 1980, Mintz Levin's environmental lawyers have successfully represented a wide range of clients navigating the requirements of CERCLA, the Resource Conservation and Recovery Act (RCRA), and corresponding state laws. We have counseled both individual companies and groups of potentially responsible parties (PRPs) as lead counsel or group chair.

Our Environmental Law Practice has a long history of assisting clients in the defense and settlement of claims asserted by state and federal governments. We have successfully addressed a wide range of issues from liability to divisibility of harm and allocation through discovery, negotiations, mediation, arbitration, and, where necessary, litigation.

Our environmental attorneys also have worked extensively with the best environmental engineers to develop and implement cost-effective remedies.
